Summary

Sewer Lines

Description

The Onondaga County sewer line geographic dataset was created by the Onondaga County Department of Water Environment Protection (OCDWEP) in early 2014. This dataset was designed to provide users with the general location of sanitary sewer features that convey the flow of sewage and storm water through pressurized force mains in the Onondaga County Sanitary District. Sewer lines were inputted to the dataset based on information obtained from maps produced by various consultants and engineering firms ranging from the early 1900s to present day.

Use limitations

The data displayed within has been compiled by the OCDWEP and incorporated into the department's geometric utility network of sewerage within the County. The data has been obtained through both field reconnaissance as well as review of record drawings. The data are dynamic and may change over time and are not better than the original sources from which they were derived. While OCDWEP has tried to maximize the accuracy of the data through its collection methods, Onondaga County gives no warranty, expressed or implied, as to the accuracy, reliability, or completeness of these data and shall not be held liable for improper or incorrect use of the data contained herein. These data are not legal documents and are not intended to be used as such. This data should not be used for the location of utilities.

Extent

West -76.377051 **East** -75.933805
North 43.242829 **South** 42.970032

Scale Range

Maximum (zoomed in) 1:5,000
Minimum (zoomed out) 1:150,000,000
